

Here are some of the devices you can find at the Communication Center:

Lingraphica: a communication device for aphasia, apraxia and stroke victims, with a vocabulary of pictures that talk in a natural human voice. For example, the Lingraphica has the "Speech Practice" that allows a user to speak a word or phrase and then record the user repeating the same word or phrase. The user plays back the recording and compares his or her speech to the Lingraphica voice.

Dynawrite: DynaWrite 2.0 enables adults and children with adequate literacy skills who prefer a keyboard-based device to speak their minds and thrive socially, academically and vocationally by combining the versatility of a full-size keyboard with powerful communication and rate enhancement tools. It's easy to communicate with the DynaWrite 2.0 - just type and talk

TTY Uniphone: The Uniphone is an exciting new concept in TTYs, combining a telephone, TTY and amplified phone - all in one! Now, people who are deaf, hard of hearing, or hearing can all share one phone. A full-featured TTY, the Uniphone includes a bright display and a comfortable keyboard and an amplified handset.

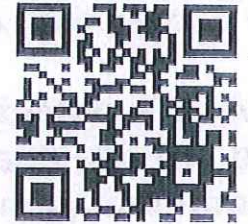

Caption call phone: The hard of hearing simply places a call, and receives the hearing party's end of the conversation via captioned text.

Dynavox Maestro: The DynaVox Maestro gives individuals with speech and language disabilities the confidence to make their voices heard in every situation by putting the focus on communication. Sleek, stylish design combines with powerful communication tools and cutting-edge technology to empower efficient communication.

This CALIF barcode will redirect to CALIF Website that is still under construction.

HP Computer: The computer has Video Relay Service that deaf consumers can use to access interpreters and communicate with others. In addition, it has an integrated camera to do face to face communication.

The purpose of the Communication Center:

- ◆The CALIF Communication Center was put into operation to provide access to equipment, tools, ways of connecting, and better communication for people with disabilities.
- ◆CALIF's objective is to expand our resources and provide quality service in using the Communication Center for individuals, groups, all people with disabilities including seniors whether it be "high tech" or "low tech" information.
- ◆CALIF offers group training on our devices with scheduled appointments only. If you have any questions feel free to call AT Coordinator Sergio Garibay at the phone number on this brochure, or email him at sgaribay@calif-ilc.org

Time of operation: Monday to Friday
9:30 AM - 4:00 PM

WELCOME to CALIF Communications Center!!!

Communities Actively Living Independent & Free is pleased to welcome the disabled community and others to come see their new Communication Center. In March 2011, CALIF was awarded a grant by the California Communication Access Foundation to implement the Communication Center.
